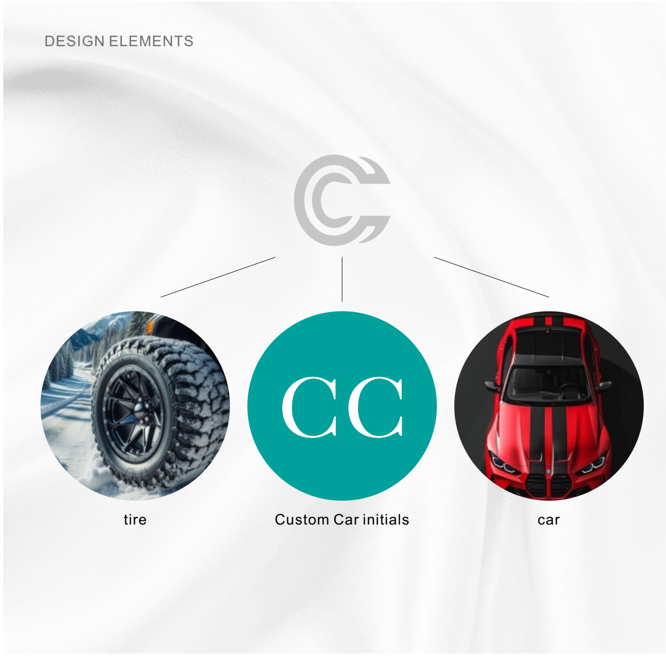
DESIGN ELEMENTS



DESIGN ELEMENTS

The LOGO design cleverly integrates the brand name "Custom Car" with core elements, showcasing a unique brand personality and industry attributes. The following is its design philosophy:

1. Graphical symbols

The red graphic at the top of the LOGO is a combination of the initials "CC" of "Custom Car". It resembles a car tire, symbolizing the meticulous craftsmanship and perfect integration of various components in the process of car modification. At the same time, it also resembles the dynamic trajectory of a rolling wheel, reflecting the unique dynamism and vitality of the automotive industry. Furthermore, this graphic also resembles two closely connected rings, symbolizing the stable partnership between the brand and its customers, as well as the pursuit of excellence in the field of car modification and restoration.

2. Typography design

"Custom Car" is presented in bold black English, concise and powerful, highlighting the internationalization and professionalism of the brand, allowing the audience to quickly understand the brand's business scope and enhancing the brand's recognition in the domestic market.

3. Core "CC"

The white "CC" on the red circular background in the middle stands for "Custom Car", which is concise and eye-catching, reinforcing the brand's memorable identity. The red circular background symbolizes passion, dedication, and excellence, conveying the brand's love and persistent pursuit of the car modification and restoration industry.

4. Element integration

The integration of tire elements visually demonstrates the important components in car modification and restoration, emphasizing the brand's professional capabilities in tire modification and restoration. The silhouette of the car on the right showcases the results of careful modification, highlighting the brand's service strength in creating personalized, high-performance cars for customers. These two elements, along with the "CC" logo, are connected by lines, forming an organic whole, symbolizing that the brand uses its core business as a link to connect all aspects of car modification and restoration, providing customers with comprehensive and high-quality services.

The entire LOGO design is concise yet profound, skillfully combining graphics, text, and supporting images to fully showcase the professional image, service philosophy, and business characteristics of the "Custom Car" brand in the field of car modification and restoration.
